

Infinity First Choice Moderate Portfolio Factsheet

July 2024

About Infinity Asset Management

Established in 2017, Infinity Asset Management is the investment management business of Infinity Capital Solutions, the investment solutions arm of the diversified financial services firm, Viridian Financial Group. Infinity is an award-winning specialist investment manager offering a diverse range of managed account and unit trust investment solutions. The investment team has over 100+ years of combined experience and manages in excess of \$A3.7bn across multi-asset, private markets, and Australian equity portfolios.

Our Investment Philosophy

Infinity's multi asset investment approach is premised on the view that financial markets are inefficient over the short to medium term, and that active portfolio management can protect, as well as be a source of added value for investors. Infinity fundamentally believes that portfolio construction, inclusive of dynamic asset allocation and manager/security selection needs to be viewed from the perspective of managing risk for portfolios to achieve their objectives in a consistent & sustainable manner over a full market cycle.

Our Investment Process

Our investment process - built around six distinct segments:

Investment Objective

To deliver outperformance of the Consumer Price Index + 3.0% p.a. over a rolling three-year period.

Designed for Investors who

Seek exposure to a diversified mix of income & growth assets with capital appreciation over the longer term and can tolerate a moderate level of investment risk that includes the potential for negative returns in any single year.
